

Publications:

1. Development of rapid and sensitive high throughput assays for marine phycotoxins. 1994 **Natural Toxins** 2:189-196. [Abstract Available](#)
2. Assessment of the involvement of algal toxins in the 1994 Texas fish kills. **Characteristics and Causes of the Texas Marine Stradings** 143: 41-45.
3. In vitro biochemical methods and mammalian bioassays for phycotoxins. 1995 **Manual on Harmful Marine Microalgae**, UNESCO Publ. Paris. pp. 177-228.
4. Microplate receptor assays: laboratory procedures for analysis of marine biotoxins. 1996 **Proceedings of the Workshop Conference on Seafood Intoxications: Pan American Implications of Natural Toxins in Seafood**. Miami, FL pp. 50-56.
5. Hypertension and identification of toxin in human urine and serum following a cluster of mussel-associated paralytic shellfish poisoning outbreaks. 1997 **Toxicon** 35(5)711-722. [Abstract Available](#)
6. A cell based assay for brevetoxins, saxitoxins, and ciguatoxins using a stably expressed c-fos-luciferase reporter gene. 1997 **Analytical Biochemistry** 251:129-132. [Abstract Available](#)
7. Microplate receptor assay: tools for monitoring seafood toxins. 1997 **Wallac World Wide ISSN 1238-5735** 2: winter.
8. Bacterial interactions with harmful algal bloom species: bloom ecology, toxigenesis, and cytology. 1998 **The Physiological Ecology of Harmful Algal Blooms**. pp. 619-648.
9. Algicidal bacteria active against *Gymnodinium breve* (Dinophyceae). I. Bacterial isolation and characterization of killing activity. 1999 **J. Phycology** 35:1447-1454.
10. Isolation and characterization of the bacterial flora associated with PSP-related dinoflagellate species. 1999 **Harmful Algae** 1356-1367.
11. Diel phasing of the cell cycle in the Florida red tide dinoflagellate, *Gymnodinium breve*. 1999 **J. Phycology** 35: 93-103.
12. Reporter gene assays for algal-derived toxins. 1999 **Natural Toxins** 6:415-421. [Abstract Available](#)
13. "Shellfish Toxins" Chapter: 2000 **Marine and Freshwater Products Handbook**. Technomic Publishing Co., Inc., Lancaster. Pp.727-738.
14. Cell cycle regulation in a dinoflagellate, *Amphidinium operculatum*: identification of the diel entraining cue and a possible role for cyclic AMP. 2001 **J. Exper. mar. Biol. Ecol.** 262:177-197.
15. Modification of the cell based assay for brevetoxins using human cardiac voltage dependent sodium channels expressed in HEK-293 cells. 2001 **Biosensors & Bioelectronics**, in press.
16. Biomonitoring Brevetoxin exposure in mammals using blood collection cards. 2001 **Environmental Health Perspectives** 109:717-720.
17. Acute and delayed thermoregulatory response of mice exposed to brevetoxin. 2001 **Toxicon** 39:1367-1374.
18. The Red Tide toxin, Brevetoxin, induces embryo toxicity and developmental abnormalities. 2001 **Environmental Health Perspectives**, 109:377-381 [Abstract Available](#)

19. Health and Ecological impacts of harmful algal blooms: risk assessment needs.2001. **Human and Ecological Risk Assessment** 71:329-1345:
20. Microbial community interactions and population dynamics of an algicidal bacterium active against *Karenia brevis* (DINOPHYCEAE).2002 **HARMFUL ALGAE**. 1(3):277-293)
21. Type B brevetoxins show tissue selectivity for voltage-gated sodium channels: Comparison of brain, skeletal muscle, and caediac sodium channels.2003 **Toxicon** 41: 919-927
- 22 Review and Assesment of In vitro detection methods for algal toxins: conceptual approaches and recent developments.2003 **JAOAC International** 84:1617-25
